Rodvingevagen 11
613 37 Oxelosund, Sweden

CD Aviation Services invites you to participate in our Engine Maintenance Training Program. The EMT Program was created by Mike Straus, Training and Service Manager at CD Aviation Services. Mike has nearly 4 decades of hands on experience with the TPE331 engine series.

Each EMT course has been designed to provide owner/operators, mechanics and pilots with the technical information they need from a design and maintenance perspective. CD Aviation Services is dedicated to training, service and support.

Attendees of our EMT Program will get a full color reference and trouble shooting manual as well as a certificate of savings for a CDAS maintenance service.

For more information on the 1 Day, 5 Day and Custom Courses, to request a training at your facility or for training and course prices, please contact CD Aviation Services TPE331 / EMT Program Department at 866.975.2327
