

CD Aviation Services, ULC Becomes Major Service Center

Calgary, Alberta – September 1, 2008 - CD Aviation Services, ULC (CDAS), an industry-leading aircraft maintenance facility, officially joins the exclusive list of Honeywell appointed and approved TPE331 Major Level Service Centers.

In making the announcement today, General Manager Wes Wiwcharuk commented, “This is another significant milestone achievement for CD Aviation Services that continues our forward momentum towards being the premiere service center to the markets we provide services to within Canada. We are extremely proud of what our employees have helped us accomplish thus far and we are equally excited about the future prospects this authorization provides us. We value our relationship with Honeywell and look forward to working together on strategic initiatives that provide benefit and value to our aviation customers.”

As a TPE331 Major Level Service Center, CDAS provides all maintenance inspections for the TPE331-1 thru TPE331-12 models of Honeywell propulsion engines. CDAS also provides Line Maintenance for TFE731-2 thru -5/-20/-40/-50/-60 series aircraft engines as well as for Auxiliary Power Units GTCP 30-92, 36-100/150, RE 100 and RE 220 series engines.

The Honeywell TP331, TFE731 and APU engines can be found on such aircraft as the Fairchild Metro/Merlin, Commander, Dornier 228, Jetstream, Beech, Mitsubishi, Casa, Lear, Challenger, Cessna, Dassault, Gulfstream and Sabreliner.

Maintenance services for TPE, TFE and APU engines can include repair and overhaul, pre-buy inspections, engine sales, engine R&R, LRU replacement, borescope inspections, spares support, hot section inspections as well as 24-hour AOG and technical support. In addition to engine maintenance, CDAS has airframe capabilities for the Jetstream, Beech King Air 100 and Fairchild SA 26/226/227 aircraft.

CD Aviation Services, Inc. provides the highest level of professional maintenance and services for a variety of propulsion and auxiliary power turbine engines. With locations in Neosho, Missouri and Calgary, Alberta Canada, as well as European Technical and Customer Support in Sweden, CD Aviation Services is able to provide economical maintenance solutions to a large geographical area through its facilities and field service team.
